ALUMINUM & VINYL WINDOWS

**Beauty. Efficiency.
Security.**

Quality windows that enhance every home and business.

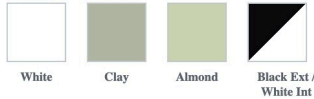

Vinyl & Aluminum Windows

Vinyl Windows

Our Star 9230 vinyl series comes with multi-chambered frames that provide excellent insulation, helping to keep indoor temperatures stable and reduce energy costs. They are made with Low-E glass coatings that reflect infrared light, improving energy efficiency by keeping heat inside during the winter and outside during the summer. Windows come with options to have grids between glass or clear glass. We also offer argon insulated windows for even better insulation.

— COLOR OPTIONS

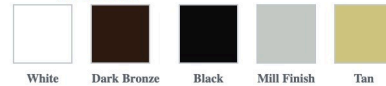

— TECHNICAL DATA

WINDOW TYPE	GAS FILL	U-FACTOR	SHGC
9230 SH	Air	0.33	0.23
9230 PW	Air	0.33	0.23
9230 HS	Air	0.33	0.23
9230 SH	Argon	0.29	0.22
9230 PW	Argon	0.29	0.22

Aluminum Windows

Our aluminum windows offer a blend of modern aesthetics and practical benefits, making them a versatile choice. Aluminum is a strong material, which allows for larger window panes and thinner frames compared to other materials like wood or vinyl. This can result in a more contemporary and unobtrusive look. Similar to vinyl windows, these windows also come with Low-E glass and have an option to add grids between the glass. Argon gas option is also available. Please note our aluminum windows are not thermally broken.
